PROFILE

Detail-oriented Data Analyst with a Bachelor in Technology in Computer Science and strong command of Python, SQL, C# and Power BI. Experienced in building real-time dashboards and ML-based academic projects.

EDUCATION

GLA University Mathura

Uttar Pradesh, India

Bachelor of Engineering in Computer Science

2023 – 2026

- Demonstrated academic excellence throughout the program
- Relevant coursework in [Data Structures, ML, Data Science, DBMS, Computer Networks, etc.]

Diploma in Computer Science

2020 – 2023

Class 10th (CBSE)

2019 – 2020

SKILLS

Technical: SQL, Python, ETL, Data Visualization, Machine Learning, Java, C#

Tools: AWS (S3, Athena, EC2), Tableau, Power BI, Excel

CERTIFICATIONS

- Introduction to Network – Feb'25 ([link](#))

EXPERIENCE

Capgemini – Trainee C# Development ([link](#))

Dec 2025 – April 2026

- Completed 5-month intensive training in C# and ASP.NET, focusing on object-oriented programming, collections, exception handling, file I/O, and web application development.
- Developed multiple console-based applications and mini-projects, including a Student Management System and Real-Time Chat Application.
- Built web-based features using ASP.NET MVC, including form handling, user authentication, and database connectivity.
- Gained hands-on experience with Visual Studio, .NET fundamentals, debugging techniques, and server-side logic.
- Collaborated in team-based coding exercises and version control using Git, following agile practices.
- Strengthened problem-solving skills through daily coding challenges and mock real-world scenarios.

I- DIARY IT SOLUTIONS PVT. LTD. ([link](#))

Agra, India

Data Analyst Intern

June 2024 – August 2024

- Developed 4 Power BI dashboards by integrating SQL and Python pipelines, leading to 30% faster KPI analysis.
- Cleaned and processed 50,000+ data rows using SQL and Pandas to ensure 95% data accuracy and readiness for analytics.
- Collaborated with 5+ stakeholders to translate business needs into interactive dashboards, boosting insights delivery.
- Optimized Power BI dashboards by tuning DAX queries and backend SQL, reducing load time by 40%.
- Designed and implemented reusable data transformation scripts, improving overall report development efficiency by 25%.
- Documented the end-to-end data pipeline and dashboard workflows to support team knowledge sharing and future scalability.

PROJECTS

CLASS ATTENDANCE MANAGEMENT SYSTEM USING MACHINE LEARNING AND IOT

Jan 2025 – March 2025

- Developed a smart classroom attendance system to automate student tracking using facial recognition and real-time video capture from an overhead camera.

- Utilized Python, OpenCV, and face recognition libraries for detection, with an IoT setup for continuous monitoring and timestamp logging.
- Improved attendance accuracy by 90% and enhanced classroom security by alerting admins about unauthorized entries within the first 15 minutes.

Bank Loan Analysis

August 2024 – Sept. 2024

- Analyzed large-scale bank loan datasets using SQL and Python (Pandas) to uncover patterns in approvals, defaults, and borrower risk factors.
- Focused on key metrics such as borrower demographics, credit history, repayment status, and loan types to support risk analysis.
- Created interactive Power BI dashboards with DAX measures and slicers, enabling real-time filtering and insight-driven decisions for stakeholders.

ACHIEVEMENTS

- Participated in a Hackathon organized by GLA University, showcasing problem-solving and teamwork skills. ([link](#))
- Achieved a Gold Medal in a city-level General Knowledge competition, demonstrating strong analytical and awareness abilities. ([link](#))
